01 SKILLS

Microsoft Fabric

Lakehouse · Data Pipelines · Notebooks · Warehouse · OneLake · Deployment Pipelines · Git Integration · Semantic Models · Direct Lake · Capacity Mgmt · FUAM

Databricks

PySpark · Delta Lake · Unity Catalog · Workflows · Auto Loader · DQ Framework · Medallion

Azure

Data Factory · Synapse · ADLS Gen2 · Azure SQL · Logic Apps · Managed Identity · Event Hubs

Languages, DevOps & Orchestration

Python · SQL · KQL · Java · Azure DevOps CI/CD · Git · Terraform · Docker · Airflow · dbt · Kafka

Data Sources & BI

SAP · SQL Server · SharePoint · REST APIs · Snowflake · Power BI

AWS

S3 · Glue · Redshift · Athena · Kinesis

02 CERTIFICATIONS

DP700 — Fabric Data Engineer Associate
Microsoft · verify ↗

DP203 — Azure Data Engineer Associate
Microsoft · verify ↗

+ Azure Fundamentals (AZ-900) · AWS Partner Accreditation · Synapse Analytics Core Specialist

03 PROFILE

Data Engineer with **6+ years** building enterprise-scale data platforms on Azure and AWS. Hands-on specialist in **Microsoft Fabric** and **Databricks**: currently leading a production **Synapse → Fabric migration**, governing a 16-capacity Fabric estate, and building PySpark data-quality frameworks on Delta Lake. Integrates SQL, SAP, SharePoint and API sources into medallion lakehouses, and ships every change through Git and Azure DevOps CI/CD.

04 EXPERIENCE

Data Engineer · Atos
May 2023 – Present

MICROSOFT FABRIC

- **Led the Azure Synapse → Fabric migration:** assessed 14 resource types and migrated Bronze, Silver and Gold pipeline layers plus serverless SQL to Stage and Production.
- **Built Dev → Test → Prod deployment pipelines** with Git-integrated workspaces, plus an automated Teams alert (notebook + Logic App) for uncommitted Git changes.
- **Designed event-driven SharePoint → Lakehouse ingestion** using Logic Apps, managed identity, the OneLake API and the Fabric Jobs API.
- **Deployed Fabric Unified Admin Monitoring (FUAM)** across 16 capacities and delivered a capacity right-sizing and cost-saving analysis.
- **Built a "Capacity Advisor" Fabric app** with capacity utilisation, AI notebook-code recommendations and report-usage dashboards.
- **Migrated semantic models and 8 Power BI reports cross-tenant** with semantic-link-labs; built notebook pipelines for finance consumption lakehouses.

DATABRICKS & AZURE

- **Built a reusable PySpark data-quality framework in Databricks** validating schema, nulls, duplicates and referential integrity on multi-TB Delta Lake data.
- **Developed medallion transformation logic in Databricks**, orchestrated with ADF and feeding Synapse and Snowflake.
- Designed ETL/ELT pipelines in Azure Data Factory from heterogeneous SQL, SAP and data-lake sources.
- Set up Azure infrastructure and Azure DevOps CI/CD; mentor peers on Databricks, Fabric and Azure.

`Fabric` `Databricks` `PySpark` `ADF` `Synapse` `Logic Apps` `Snowflake` `Azure DevOps`

Big Data Engineer · Microsoft (via LTIMindtree)
Feb 2022 – Apr 2023

- Worked directly with client stakeholders as an Azure contractor, designing end-to-end data architecture.
- **Built Azure Databricks PySpark notebooks** transforming multi-TB datasets into Delta Lake tables, orchestrated from ADF.
- Built ADF pipelines from ADLS Gen2 to Azure SQL and custom incremental-load logic in Synapse, replacing manual full loads.
- Established Azure DevOps repos, branching and CI/CD; owned ETL delivery and client relationship end to end.

04 EXPERIENCE (CONTINUED)

Data Engineer – L2 · Hitachi Vantara

Oct 2020 – May 2022

- Built a scalable Amazon S3 data lake centralising structured and unstructured data.
- **Developed Databricks on AWS PySpark jobs** processing raw S3 data into curated Delta Lake layers before loading to Redshift.
- Designed AWS Glue ETL into Redshift and real-time streaming with Kinesis.
- Delivered SQL analysis and dashboards with Athena and QuickSight.

Databricks · Glue · Redshift · Kinesis · S3

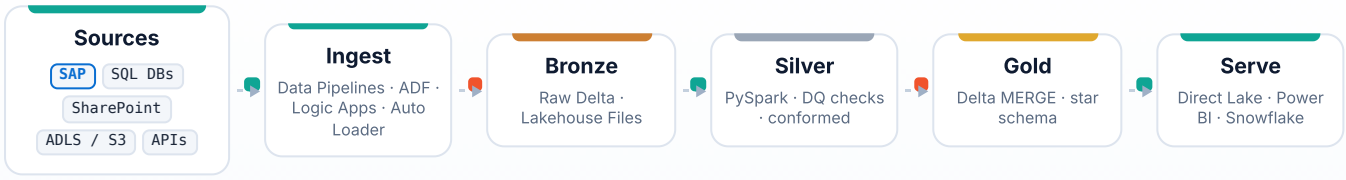

Data Support Specialist · Sitel

Dec 2018 – Sep 2020

- Log analysis and remote configuration of on-premise data storage and warehouse systems, resolving performance issues.
- Coordinated hardware procurement for on-premise data warehouses to minimise downtime; tracked work in Oracle ticketing.

On-prem DWH · Oracle

06 PLATFORM I BUILD

Medallion lakehouse delivered on both platforms, governed and deployed through CI/CD

Microsoft Fabric · Databricks

07 KEY PROJECTS

Synapse → Fabric Platform Migration

Assessed and migrated a production Synapse platform (Bronze/Silver/Gold + serverless SQL) to Microsoft Fabric with documented runbooks.

Fabric · Synapse · Lakehouse

Fabric Capacity Governance & Cost Optimisation

Monitored 16 Fabric capacities with FUAM and delivered right-sizing recommendations with pay-as-you-go savings.

FUAM · Notebooks · Power BI

Enterprise Data Quality Framework

Reusable PySpark checks in Databricks standardising transformation logic and cutting manual QA effort.

Databricks · PySpark · Delta

Event-Driven SharePoint Ingestion

Logic App + managed identity pipeline landing files in a Fabric Lakehouse and triggering downstream pipelines via the Fabric API.

Logic Apps · OneLake · Fabric API

Fabric Git Change Monitor

Notebook + Logic App detecting uncommitted Git changes across workspaces and @mentioning owners in Teams.

Fabric Git · Logic Apps · Teams

AWS Data Lake & Real-Time Analytics

S3 data lake with Glue ETL, Databricks processing and Kinesis streaming for near-real-time dashboards.

S3 · Databricks · Kinesis

08 EDUCATION

Bachelor's Degree, Computer Engineering
Poland

Diploma in Computer Science
Singapore

09 HOW I SHIP
